

Environmental Protection – Reminders Surround Us

Onita Basu

Carleton University,
1125 Colonel By Dr, Ottawa, ON K1S 5B6

We are flooded in the news by situations where better environmental engineering, and better responses to climate change adaptation needs could prevent degradation of the biophysical environment and improve human health. Dr. Basu will highlight some recent cases around the world that have received national and international attention in relationship to water resources and water use which have lead to unfortunate situations of environmental stress with direct consequences on human health and/or the aquatic environment.
