WELCOME MESSAGE FROM THE CONFERENCE CHAIR

On behalf of the International Academy of Science, Engineering and Technology (International ASET Inc.), the organizing committee would like to welcome you to the 5th International Conference on Statistics: Theory and Applications (ICSTA 2023).

The goal of ICSTA 2023 is to gather scholars from all over the world to present advances in the relevant fields and to foster an environment conducive to exchanging ideas and information. This conference will also provide an ideal environment to develop new collaborations and meet experts on the fundamentals, applications, and products of the mentioned fields.

In the fifth meeting of this conference, one Plenary Speaker and four keynote speakers will share their expertise with the aim of exposing participants to a wide spectrum of applications, and to foster crosspollination of ideas and develop new research interests. In addition, approximately 30 papers will be presented from professors, students, and researchers across the world.

We thank you for your participation and contribution to the 5th International Conference on Statistics: Theory and Applications (ICSTA 2023). We wish you a very successful and enjoyable experience.

Dr. Noelle Samia  
Northwestern University, USA  
Conference Chair  
ICSTA 2023

Dr. Dirk Husmeier  
The University of Glasgow, UK  
Conference Co-Chair  
ICSTA 2023
The 5th International Conference on Statistics: Theory and Applications (ICSTA 2023) aims to become the leading annual conference in fields related to Statistics: Theory and Applications. The goal of ICSTA 2023 is to gather scholars from all over the world to present advances in the fields related to Statistics: Theory and Applications and to foster an environment conducive to exchanging ideas and information. This conference will also provide an ideal environment to develop new collaborations and meet experts on the fundamentals, applications, and products of the mentioned fields.

ICSTA is an international conference will be held yearly. This conference focus on all aspects Statistics: Theory and Applications. ICSTA Will be held this year in Brunel University, London, United Kingdom.

- The proceedings are published in Ottawa, Canada.
- All papers were peer-reviewed
- The congress proceedings is published under an ISSN and ISBN number
- Each paper is assigned a unique DOI number by Crossref
- The conference proceedings are indexed by Scopus and Google Scholar
- The proceedings is permanently archived in Portico (one of the largest community-supported digital archives in the world)
We would like to thank the following for accepting to act as a member of the Scientific Committee for the ICSTA 2023 Conference:

**Scientific Committee Members**

- Dr. Mylène Bédard, University of Montreal, Canada
- Dr. Yogendra Chaubey, Concordia University, Canada
- Dr. Michael Evans, University of Toronto, Canada
- Dr. Xiaoming Huo, Georgia Institute of Technology, USA
- Dr. Dirk Husmeier, University of Glasgow, UK
- Dr. Yi Li, University of Michigan, USA
- Dr. Hosam M. Mahmoud, George Washington University, USA
- Dr. Dimitrios Paraskevis, National and Kapodistrian University of Athens, Greece
- Dr. Azizur Rahman, Charles Sturt University, Australia
- Dr. Noelle Samia, Northwestern University, USA
- Dr. Kimberly Sellers, Georgetown University, USA

**Conference Chair**

Dr. Noelle Samia  
Northwestern University, USA  
Conference Chair

**Conference Co-Chair**

Dr. Dirk Husmeier  
The University of Glasgow, UK  
Conference Co-Chair

**Local Committee Member**

Dr. Jürgen Pilz  
University of Klagenfurt, Austria  
Local Committee Member
PLENARY & KEYNOTE SPEAKERS

The keynote information for the International 5th International Conference on Statistics: Theory and Applications (ICSTA 2023) is as follows:

Plenary Speakers

Dr. Melissa Wilson
Arizona State University, USA

Keynote Speakers

Dr. Stefano Castruccio
University of Notre Dame, USA

Dr. Jian Kang
University of Michigan, USA

Dr. Cynthia Rudin
Duke University, USA
Melissa Wilson is a computational evolutionary biologist whose main research interests include sex-biased biology. Her lab studies the evolution of sex chromosomes (X and Y in mammals), how changes in population history affect the sex chromosomes differently than the non-sex chromosomes, and develops novel approaches to incorporating sex as a biological variable into genomics research. Usually she studies mammals, with a particular focus on how the evolution of the placenta shaped sex differences in human health and how sex differences in the placenta may underlie sex differences in the developmental origins of disease. Dr. Wilson completed a Bachelor’s in Mathematics at Creighton University and a Ph.D. in Integrative Biosciences: Bioinformatics and Genomics at Penn State University. She was a Miller Fellow at UC Berkeley before starting The Sex Chromosome Lab at Arizona State University. Although the lab primarily focuses on mammals, being located in the Sonoran desert precipitated additional projects including the study of sex chromosomes in the Gila monster, and population genetics in desert tortoises.
Prof. Castruccio obtained his PhD at the University of Chicago (USA), and has worked in Saudi Arabia and the United Kingdom before his current appointment as Associate Professor at the University of Notre Dame (USA). His main area of research focuses on the development of spatio-temporal statistical models for environmental applications, with applications spanning from assessment of renewable energy to assessing mortality from air pollution. His focus is mostly on climate and weather modes, and the use of statistical and machine learning models that can act as a stochastic approximation to provide a computationally affordable assessment of parameter sensitivity analysis. His methodological research is focused on the development of non-stationary Gaussian processes in Euclidean and spherical domains, and in scalable multi-resolution inference for high-dimensional processes in space and time.

Dr. Jian Kang is a Professor in the Department of Biostatistics at the University of Michigan. He received his PhD in Biostatistics from the University of Michigan in 2011. He was an Assistant Professor in the Department of Biostatistics and Bioinformatics and the Department of Radiology and Imaging Sciences at Emory University from 2011-2015. His main research interests are developing statistical methods and theory for large-scale complex biomedical data analysis with focuses on Bayesian approaches, imaging statistics and bioinformatics. He has co-authored over 110 publications in statistical journals and medical journals. Dr. Kang currently serves as the Associate Editor of Annals of Applied Statistics, Biometrics, The New England Journal of Statistics in Data Science and Statistics in Medicine. Dr. Kang was elected as the Fellow of the American Statistical Association in 2021.
Cynthia Rudin is Earl D. McLean, Jr. Professor of Computer Science, Electrical and Computer Engineering, Statistical Science, Mathematics, Biostatistics & Bioinformatics at Duke University. She directs the Interpretable Machine Learning Lab, whose goal is to design predictive models that people can understand. Her lab applies machine learning in many areas, such as healthcare, criminal justice, and energy reliability.

Prof. Rudin holds an undergraduate degree from the University at Buffalo and a PhD from Princeton University. She is the recipient of the 2022 Squirrel AI Award for Artificial Intelligence for the Benefit of Humanity from the Association for the Advancement of Artificial Intelligence (the “Nobel Prize of AI”). She is also a three-time winner of the INFORMS Innovative Applications in Analytics Award, and a 2022 Guggenheim Fellow. She is a fellow of the American Statistical Association, the Institute of Mathematical Statistics, and the Association for the Advancement of Artificial Intelligence. She has recently joined the US National AI Advisory Committee (NAIAC) as a member of the Subcommittee on AI and Law Enforcement.
LIST OF PAPERS

The following papers were presented at the 5th International Conference of Energy Harvesting, Storage, and Transfer (ICSTA 2023).

Applied Statistics

**Lipschitz Variational Approximation of Total Variation Distance**
Author: Rui Ding

**GSDMM Model Evaluation Techniques with Application to British Telecom Data**
Authors: Hesham Abdelmotaleb, Małgorzata Wojtyś, Craig McNeile

**Forecasting Financial Times Series with Long Memory and Structural Break**
Authors: Euloge Francois Kouame, Lanzeni Tuo

**Deception Detection using Random Forest-based Ensemble Learning**
Authors: Kun Bu, Kandethody Ramachandran

**Fuzzy Clustering Of Ordinal Time Series Based On Two Novel Distances**
Authors: Ángel López-Oriona, Christian H. Weiss, José A. Vilar

**Validation of Two-sample Location-scale Model Using Empirical Likelihood Based Statistics**
Authors: Leonora Pahirko, Janis Valeinis, Janis Gredzens, Madara Krumina

**Evaluating closed-loop effects from vasodilator administration for pulmonary hypertension treatment**
Authors: Agnieszka Borowska, Mitchel Colebank, Mette Olufsen, Dirk Husmeier

**Statistics Anxiety: What are the antecedents?**
Authors: Milica Maricic, Teodora Rajkovic, Danica Lecic-Cvetkovic, Marina Ignjatovic
LIST OF PAPERS

Applied Statistics

Using Indicators of Entrepreneurial Ecosystem Quality for Segmenting Countries: A Biclustering Approach
Authors: Teodora Rajkovic, Milica Maricic, Ognjen Andjelic, Marina Ignjatovic

An Overview of Statistical Models in High Throughput Screening (HTS) for Toxicity Data
Authors: Mehdi Razzaghi

Big Data and Design of Experiments: A Combination Which Can Enhance the Performances of Machine Learning Models
Authors: Rosa Arboretti, Livio Corain, Alberto Molena

Multivariate Permutation Test for Model Selection
Authors: Elena Barzizza, Riccardo Ceccato, Luigi Salmaso

Cause-Specific Mortality In Southern Uganda Using Verbal Autopsy 1999-2019
Authors: Doreen Nabukalu, Julia Calazans, Milly Marston, Fredrick Makumbi, Tom Lutalo, Jim Todd
LIST OF PAPERS

Statistical Methodology

Variable Selection for a Contaminated Mixture of Normals Classification Model
Authors: Jorge Sánchez, Nema Dean, Tereza Neocleous

High Dimensional Change Points: Challenges and Some Proposals
Authors: Lupeng Zhang, Reza Drikvandi

FReET: Software for Uncertainties Propagation
Authors: Drahomír Novák

Medical Statistics

Bayesian inference of cardiac models emulated with a time series Gaussian process
Authors: Yuzhang Ge, Dirk Husmeier, Alan Lazarus, Arash Rabbani, Hao Gao

PRECISION-LerVAD: A personalized algorithm to detect cardiac arrythmia and major bleeding in LVAD devices
Authors: M. Moazeni, L. Numan, M.K. Szymanski, N.P. Van der Kaaij, F.W. Asselbergs, L.W. van Laake , E. Aarts

Estimating the Prevalence of Severe Psychiatric Disorders among Underages in Italy Using Capture-Recapture Methods
Authors: Danilo Alunni Fegatelli, Luca Tardella, Francesco Catenacci, Giulia Natalucci, Noemi Faedda, Dario Calderoni

Development of a Hospital Frailty Risk Score for Community-dwelling Older Adults Using Data from Electronic Hospital Records in South Korea
Authors: Jinhee Kim, Hee-Sun Kim, Gihwan Bae
LIST OF PAPERS

Time-Series Analysis

Diagonal Vector Autoregressive and Multivariate Autoregressive Distributed Lag Models and Their Variance Properties
Authors: Anthony Usoro, Emediong Usoro

Fisher-Shannon Analysis of MODIS Terra Evapotranspiration Satellite Data to Reveal Status of Plant Infection
Authors: Luciano Telesca, Nicodemo Abate, Farid Faridani, Michele Lovallo, Rosa Lasaponara

Short and Long-term Forecasting of Emerging Market Data using ARIMA-based and Boosting Machine Learning Algorithms
Authors: Md Al Masum Bhuiyan, Constanza Zurita Valdebenito, Md Shamsul Alam, Nusrat Sarmin

Return to Top
LIST OF PAPERS

Computational Statistics

**Scalable Simulations of 3D Turbulence Fine Structure in Nanoflare Using a Novel Plasma Statistical Algorithm**
Authors: Bojing Zhu, Yan Li, Zhikuo Ma, Hui Yan, Ying Zhong, Wu Wang, Yufeng Guo, L. Zheng, David A Yuen

**Fuzzy C-Medoids Clustering Of CUB Data to Handle Likert-Type Scales Uncertainty**
Authors: Elena Barzizza, Nicolò Biasetton, Riccardo Ceccato, Marta Disegna, Alberto Molena

**Product Quality Control Forecast Using Machine Learning Algorithms: a Case Study**
Authors: Rosa Arboretti, Elena Barzizza, Nicolò Biasetton, Riccardo Ceccato, Livio Corain, Marta Disegna, Luca Pegoraro, Luigi Salmaso, Andrea Vinelli, Pietro Barbieri, Luca Bortolan, Matteo Canale, Marco Giada, Davide Longi, Fabio Napol, Danny Paganin

**Bayesian Model Selection and Emulation for Protein Fluorescence**
Authors: William Ryan, Dirk Husmeier, Olaf Rolinski, Vladislav Vyshemirsky
International ASET Inc. would like to thank the following sponsors for their support of ICSTA 2023:
ICSTA 2024

The 6th International Conference of On Statistics: Theory and Applications (ICSTA 2024) will be held on August, 2024 | Berlin, Germany.

For inquiries and to obtain further information on the conferences, please visit our website [website]
You can also email info@icsta.net or call us at: +1-613-834-9999
At International ASET Inc., we take matters that relate to ethics in publishing very seriously. We believe that the peer-review publication process is a vital building block of academia, and its integrity must be maintained at all costs, which is why every article will be peer-reviewed by several experts in the field. Under peer-review, experts in the related fields are required to provide opinions and comments on the improvements of the submissions.

We are proud of our efforts towards abiding by the guidelines of ethics, integrity, and high standards in publishing.

**Following are the ethics guidelines set by the organizers for the authors and the reviewers of the conference:**

**Scientific Committees**

Scientific committees consisting of experts in the fields are established. The committees oversee the peer-review and publication process. To see the scientific committee members, please follow the link: [Scientific Committee](#)

**Equality and Decisions**

One or more reviewer, scientific committee member, or chair, (internal or external), are responsible for evaluating the relevance of the submitted manuscripts to the proceedings, technical and scientific merit, originally, and impact. These evaluations are to be carried out regardless of ethnicity, religion, gender, sexual orientation, political beliefs, and institutions. Successive to peer-review, the Chair has full authority and is solely responsible for the published content and the process thereof.

**Confidentiality**

Scientific committee member(s) and publishing staff may not disclose manuscripts or their content, directly or indirectly, to anyone other than individuals invited to review the manuscript (whether they accept or not), other reviewers of the same publications, and publishing staff.

**Conflicts of Interest**

Scientific committee member(s) and publishing staff may not utilize the contents of submitted manuscripts whether accepted or rejected, directly or indirectly for their own research purposes without prior written consent by the authors.
Reviewers

Contribution to Decisions
In order for final decisions to be made regarding acceptance or rejection of papers, we rely on peer-review. Peer-review is the process of experts in the field reading, understanding, and objectively commenting on submitted papers. Through peer-review, scholars give back to the academic and scientific community by helping the chair(s) make decisions regarding manuscripts.

Promptness
Reviewers should promptly notify the chair(s) if they are unable or unqualified to carry out their reviewing duties. Reviewers should do their best to provide the reviews to the chair(s) as promptly as possible, and within the designated time-frame.

Acknowledgment of Source
The reviewer should notify the chair(s) if they find any similarities in the paper being reviewed and any other work that has been published previously.

Confidentiality
Reviewers must not share the contents of the manuscripts they receive for review, regardless of their decision to review or contents of the review, directly or indirectly, with anyone other than the person who has assigned the review.

Fairness
Reviewers should review manuscripts fairly and objectively, with supporting evidence or arguments, regardless of personal feelings or biases.

Conflicts of Interest:
Invited reviewers should immediately inform the chair(s) in case of a conflict of interest based on competitive, collaborative, personal, family, and other relationships with the authors or people involved in the work.
ETHICS & MALPRACTICE

Authors

**Reporting Standards**
The paper being submitted for the proceedings should be based on clear objective, discussion, and references. The findings, data, and the arguments being used in the paper should be accurate. It is author’s responsibility to guarantee the authenticity of the data in the paper.

**Authorship**
Only persons who have significantly contributed to the work and the manuscript can be named authors on a paper. These contributions include the idea/concept, design, experiments, evaluation, analysis, drafting or revision of the manuscript, and others. Authors must all have agreed to be named as such and for the manuscript to be submitted. Anyone who has contributed based on the above, but the level of contribution is not significant, may appear in the acknowledgement section of the manuscript.

**Acknowledgement of Source**
Acknowledgement to other’s work being used in the paper must be given at all times. Authors of the paper should give comprehensive credit where it is necessary, by citing the work, they use for supporting their own research.

**Accuracy, Originality, and Plagiarism**
Authors should describe their work and the results of their work accurately and in full. The level of provided accuracy and detail should be such that a reader can replicate the work independently. Inaccurate, incomplete, fraudulent, and misleading statements are considered unacceptable and unethical. Direct or indirect use of other people’s work is not allowed, unless properly cited. Previous works that have influenced the current work should also be cited. Presenting someone else’s work as one’s own is strictly prohibited and is considered plagiarism.

**Data and Material**
Authors are encouraged to share their data, software, or other sharable material online, provided copyright and ownership laws surrounding that particular project permit. Authors may also be asked to share such material with the chair(s), and/or reviewers, and must be willing to do so if asked.
**Dual Submissions**
Submitting a manuscript to more than one venue (conference, journal, etc) simultaneously is not allowed. Presenting previously published work to be considered as a new submission, without a significant new interpretation or analysis, is prohibited.

**Conflicts of Interest**
Authors must notify the chair(s) at the time of submission, if any factor outside the scope of the research has influenced any step of the work and manuscript writing. Examples of such factors include but are not limited to funding, grants, advisory and consultancy, stock ownership, current or past employment, and memberships, among others. All funding sources should be disclosed in the manuscript.

**Animal and Human Subjects**
Works involving human and/or animal subjects must ensure that the work has abided by institutional guidelines, and pre-approved by required bodies. Moreover, consent must be acquired from participants, and privacy of subjects must be ensured. All of the above must be specified with clear statements in the manuscript.

**Hazardous Material**
It should clearly be identified in the manuscripts if the works have involved hazardous chemicals and material, or devices that can be harmful.

**Reporting of Mistakes, Errata, and Retractions**
If an author identifies a major error in a published paper, he/she must immediately inform the publisher. Regardless of whether a significant error is reported by the authors of the work or other readers, authors are obligated to take the necessary steps to correct the issue. It is decided on a case-by-case basis whether an erratum will be submitted to notify future readers of the error and correction, or whether the paper will be retracted. Unethical/plagiarism issues mostly result in a retraction, while unintended mistakes will mostly result in the publication of an erratum.
Publisher

**Errata and Retractions**
The publisher takes the necessary steps to prevent mistakes, academic and scientific misconduct, and unethical behavior, both intended and unintended. When mistakes are reported, the publisher works with chair(s) and authors to publish an erratum clarifying the issue. In cases where the mistakes are severe and significant, the paper might be retracted. If unethical behavior, plagiarism, academic and scientific misconduct, or other such activities are proven to have taken place by an author or authors, the publisher will retract the paper.

**Content and Archiving**
The publisher preserves and stores all content digitally on their own servers, as well as through partnering with Portico (Digital Preservation and Electronic Archiving Service).

**Copyright and Access:**
The proceedings and related papers are all based on the open-access model, which means interested individuals and institutions can access the material for free.

Users are allowed to read, download, copy, distribute, print, search, or link to the full texts of the articles in this proceedings without asking prior permission from the publisher or the author. This is in accordance with the BOAI definition of open access.

**Ownership and Management:**
This conference-proceedings is managed and operated by the International ASET (International Academy of Science, Engineering, and Technology) and Avestia Publishing (the publishing arm of ASET).

**Schedule:**
This conference proceeding accompanies the conference, meaning a new proceedings will be published every year for the corresponding annual conference of this series.
For inquiries and to obtain further information on the conferences, please visit our website [website].
