WELCOME MESSAGE FROM THE CONFERENCE CHAIR

On behalf of the International Academy of Science, Engineering and Technology (International ASET Inc.), the organizing committee would like to welcome you to the 6th International Conference on Statistics: Theory and Applications (ICSTA 2024).

The goal of ICSTA 2024 is to gather scholars from all over the world to present advances in the relevant fields and to foster an environment conducive to exchanging ideas and information. This conference will also provide an ideal environment to develop new collaborations and meet experts on the fundamentals, applications, and products of the mentioned fields.

In the sixth meeting of this conference, five keynote speakers will share their expertise with the aim of exposing participants to a wide spectrum of applications, and to foster crosspollination of ideas and develop new research interests. In addition, approximately 38 papers will be presented from professors, students, and researchers across the world.

We thank you for your participation and contribution to the 6th International Conference on Statistics: Theory and Applications (ICSTA 2024). We wish you a very successful and enjoyable experience.

Dr. Noelle Samia
Northwestern University, USA
Conference Chair
ICSTA 2024

Dr. Dirk Husmeier
The University of Glasgow, UK
Conference Co-Chair
ICSTA 2024

ABOUT ICSTA 2024

The 6th International Conference on Statistics: Theory and Applications (ICSTA 2024) aims to become the leading annual conference in fields related to Statistics: Theory and Applications. The goal of ICSTA 2024 is to gather scholars from all over the world to present advances in the fields related to Statistics: Theory and Applications and to foster an environment conducive to exchanging ideas and information. This conference will also provide an ideal environment to develop new collaborations and meet experts on the fundamentals, applications, and products of the mentioned fields.

ICSTA is an international conference will be held yearly. This conference focus on all aspects Statistics: Theory and Applications. ICSTA Will be held this year in Brunel University, London, United Kingdom.

ICSTA is an acronym for International , Statistics: Theory and Applications.

- The proceedings are published in Ottawa, Canada.
- All papers were peer-reviewed
- The congress proceedings is published under an ISSN and ISBN number
- Each paper is assigned a unique DOI number by [Crossref](#)
- The conference proceedings are indexed by [Scopus](#) and [Google Scholar](#)
- The proceedings is permanently archived in [Portico](#) (one of the largest community-supported digital archives in the world)

SCIENTIFIC COMMITTEE

We would like to thank the following for accepting to act as a member of the Scientific Committee for the ICSTA 2024

Dr. Noelle Samia
Northwestern University, USA
Conference Chair

Dr. Dirk Husmeier
The University of Glasgow, UK
Conference Co-Chair

Dr. Jürgen Pilz
University of Klagenfurt, Austria
local Committee Member

Scientific Committee Members

- **Dr. Mylène Bédard**, University of Montreal, Canada
- **Dr. Dalia Chakrabarty**, Loughborough University, UK
- **Dr. Yogendra Chaubey**, Concordia University, Canada
- **Dr. Michael Evans**, University of Toronto, Canada
- **Dr. Faming Liang**, Purdue University, USA
- **Dr. Hosam M. Mahmoud**, George Washington University, USA
- **Dr. Azizur Rahman**, Charles Sturt University, Australia

KEYNOTE SPEAKERS

The keynote information for the International 6th International Conference on Statistics: Theory and Applications (ICSTA 2024) is as follows:

Keynote Speakers

[Dr. Michael Evans](#)
University of Toronto,
Canada

[Dr. Christopher Franck](#)
Virginia Tech, USA

[Dr. Marco Grzegorzczak](#)
University of Groningen,
Netherland

[Dr. Hosam M. Mahmoud](#)
George Washington University,
USA

[Dr. Min-ge Xie](#)
Rutgers University, USA

[Return to Top](#)

ICSTA 2024 KEYNOTE SPEAKER

Titles: The Concept of Statistical Evidence: Historical Roots and Current Developments

Dr. Michael Evans University of Toronto, Canada

[View Abstract](#)

[Return to Top](#)

Michael Evans is a Professor of Statistics at the University of Toronto. He received his Ph.D. from the University of Toronto in 1977 and has been employed there ever since with leaves spent at Stanford University and Carnegie Mellon University. He is a Fellow of the American Statistical Association, he served as Chair of the Department of Statistics 1992-97, Interim Chair 2022-23 and as President of the Statistical Society of Canada 2013-2014. He has served in a number of editorial capacities as follows: Associate Editor of JASA Theory and Methods 1991-2005, Associate Editor of the Canadian Journal of Statistics 1999-2006 and 2017-present, Associate Editor of the journal Bayesian Analysis 2005-2015, and as an Editor 2015-2021, Subject matter Editor for the online journal FACETS (current) and Associate Editor of the New England Journal of Statistics in Data Science (current).

Michael Evans' research has been concerned with multivariate statistical methodology, computational statistics, and the foundations of statistics. A current focus of research is the development of a theory of inference based upon an explicit definition of how to measure statistical evidence and the development of tools to deal with criticisms of statistical methodology associated with its inherent subjectivity. He has authored, or coauthored, numerous research papers as well as the books Approximating Integrals via Monte Carlo and Deterministic Methods (with T. Swartz) published by Oxford in 2000, Probability and Statistics: The Science of Uncertainty (with J. Rosenthal) published by W.H. Freeman in 2004 and 2010 and Measuring Statistical Evidence Using Relative Belief published by CRC Press/Chapman and Hall in 2015.

ICSTA 2024 KEYNOTE SPEAKERS

Titles: The Responsible Emboldening Of Probability Forecasts

Dr. Christopher Franck, Virginia Tech, USA

[View Abstract](#)

[Return to Top](#)

Chris Franck is an Associate Professor in the Department of Statistics at Virginia Tech. He is an application-oriented methodologist who focuses on statistical problems in health applications, behavioral economics, probabilistic forecasting, bioinformatics, and other areas. His work includes Bayesian statistical methodologies that can be implemented automatically and/or with objective prior information, Model selection and averaging approaches and practical methods by which to assess their sensitivities, and finally, in cases where historical data is inadequate and contemporary information is available, he develops Bayesian methods that allow researchers to formally incorporate subjective information into their analyses and predictions.

Titles: The Flexibility of Gaussian Bayesian Networks

Dr. Marco Grzegorzcyk University of Groningen, Netherland

[View Abstract](#)

[Return to Top](#)

Marco Grzegorzcyk is Associate Professor for Computational Statistics at the Bernoulli Institute of Groningen University (NL). He received his PhD in Statistics from the TU Dortmund University in Germany in 2006. Since then his main research focus has been on Bayesian network structure learning with a special focus on learning gene regulatory pathways and protein activation cascades from molecular data. He is Associate Editor of the journals 'Computational Statistics', 'The Journal of Applied Statistics' and 'Statistica Neerlandica'. Also he is involved in the Statistical Modelling Society (treasurer) and the International Biometric Society (representative council).

ICSTA 2024 KEYNOTE SPEAKERS

Titles: Recursive Trees with Generalized Affinities

Dr. Hosam M. Mahmoud George Washington University, USA

[N/A](#)

[Return to Top](#)

Titles: Repro Samples Method for Addressing Irregular Inference Problems and for Unraveling Machine Learning Blackboxess

Dr. Min-ge Xie, Rutgers University, USA

[View Abstract](#)

[Return to Top](#)

Min-ge Xie, PhD is a Distinguished Professor at Rutgers, The State University of New Jersey. Dr. Xie received his PhD in Statistics from University of Illinois at Urbana-Champaign and his BS in Mathematics from University of Science and Technology of China. He is the current Editor of The American Statistician and a co-founding Editor-in-Chief of The New England Journal of Statistics in Data Science. He is a fellow of ASA, IMS, and an elected member of ISI. His research interests include theoretical foundations of statistical inference and data science, fusion learning, finite and large sample theories, parametric and nonparametric methods. He is the Director of the Rutgers Office of Statistical Consulting and has a rich interdisciplinary research experiences in collaborating with computer scientists, engineers, biomedical researchers, and scientists in other fields.

LIST OF PAPERS

The following papers were presented at the 6th International Conference of Energy Harvesting, Storage, and Transfer (ICSTA 2024).

Applied Statistics

[Factors Influencing Business Survival: A Survival Analysis in the Albanian Business Landscape](#)

Author: Lule Basha, Eralda Gjika, Ornela Gordani

[Adapting a Correlated Random Effects Method to Handle Ignorable Missingness in the Predictors and Non-ignorable Missingness in the Response](#)

Author: Hanadi Alzahrani, Benn Macdonald, Caroline Haig, John Cleland

[Analyzing Dependencies in the Electric Vehicle Sector Using the Canonical Vine Copula](#)

Authors: Pankaj kumar, Vivek Vijay

[Bayesian Inference, Emulation and Deep Learning in Cardiac Mechanics](#)

Authors: Yuzhang Ge, Arash Rabbani, Hao Gao and Dirk Husmeier

[Bayesian Statistics Applied to the Recovery of Copper and Cobalt-Bearing Ores: Establishment of the Probability Laws of Leaching Parameters](#)

Authors: Bienvenu Mbuya, Elvis Fosso-Kankeu, Jan Bongaerts and Antoine F. Mulaba-Bafubiandi

[Statistical Models with Interactions: Tools to Improve Empirical Analyses](#)

Authors: Svitlana Shvydka, Volodimir Sarabeev, Mária Ždímalová

[Evaluation of Biostatistics Contents in ChatGPT: A Descriptive Study](#)

Authors: Arzu Baygül Eden, Alev Bakır Kayı, Mert Veznikli

LIST OF PAPERS

Applied Statistics

[Bahadur Type Representation and Berry-Esseen bound for Sample Quantiles Under Weak Dependence](#)

Authors: Bahaeddine Taoufik, Lahcen Douge

[Statistical Analysis on Factors Affecting Journal's Impact Factors](#)

Authors: Forest Ho-Chen

[Exploring Universal Kriging Modelling for Functional Greenness Data Captured by Digital Webcams](#)

Authors: Raziye Hosseini

[Mutual Information Based Correlation Analysis of Health-Related Multiple Air Pollutants](#)

Authors: Huawei Han, Wesley S. Burr

[Development of LSTM Based Models for Air Pollutant-Related Public Health Effects](#)

Authors: Huawei Han, Wesley S. Burr

[Large Language Model application and tuning for product analysis: a preliminary investigation](#)

Authors: Elena Barzizza, Nicolò Biasetton, Giorgio Caligiuri, Daniele Pennisi, Luigi Salmaso

[A Novel Particle Picking Pipeline for Cryo-EM Using Semantic Segmentation and Conditional Random Field](#)

Authors: Szu-Chi Chung, Po-Cheng Chou

LIST OF PAPERS

Applied Statistics

[Challenges in High Dimensional Change Point Analysis and Advanced Approaches](#)

Authors: Shrog Albalawi, Reza Drikvandi

[Exploring the Time Dynamics of Fire Sequences: A Case Study in the Basilicata Region \(Southern Italy\)](#)

Authors: Luciano Telesca, Angelo Aromando, Rosa Lasaponara

[Power BI Plots for Skewness and CV of Small Samples](#)

Authors: Huang, Li-Fei

[Enhancing Security in Remote Laboratory Environments: A Layered Approach](#)

Authors: Ali Al Maqousi

[Cluster-based Customer Satisfaction Analysis](#)

Authors: Elena Barzizza, Riccardo Ceccato, Luigi Salmaso

[Model-Based Clustering Analysis for Multivariate Longitudinal Data via Mixtures of Matrix-Variate t-distributions](#)

Authors: Farzane Ahmadi, Elham Faghihzadeh

[Impact of Heating System Conversion on Peak Electricity Demand](#)

Authors: Sy Keprissié John Asaph Sanogo

[To Develop The Test To Evaluate The Multivariate Distributions That Are Part Of The Normal Inverse Gaussian Class In Terms Of Fit Quality](#)

Authors: Mehmet Siddik Cadirci

LIST OF PAPERS

Applied Statistics

[An Analytical Expression for the Quotient of Odds Ratio with Applications to Cardiovascular Disease Risk](#)

Authors: Golnaz Shahtahmassebi, Jose Maria Sarabia

[Tricube Exponential Distribution](#)

Authors: Shawkat Alkhazaleh, Rawad Aloqdeh, Firas Al-Marashdeh

[Enhancing Gene Expression Data Analysis through SVM-Based Recursive Cluster Elimination and Weighted Center Approaches](#)

Authors: Malik Yousef, Nurten Bulut, Burcu Bakir Gungor, Bahjat F. Qaqish

LIST OF PAPERS

Computational Statistics

Physics-informed deep learning based on the finite difference method for efficient and accurate numerical solution of partial differential equations

Authors: Jiaming Zhang, David Dalton, Hao Gao, Dirk Husmeier

The Statistical Assessment of Variables Affecting Conservation Condition for Historic Houses

Authors: Hatice Ayşegül Demir, Nihan Bulut, Mine Hamamcıoğlu Turan

On the Estimation of Joint Density Functions via Copulas

Authors: Serge B. Provost, Yishan Zang

Study Over Some Approaches in Formulating Optimal Designs

Authors: Akram Mahmoudi, Saumen Mandal

LIST OF PAPERS

Poster Session

[Comparison Of Methods To Estimate The Average Treatment Effect In Longitudinal Studies When Model Residuals Are Not Normally Distributed](#)

Authors: Anna Morra, Maya Marintcheva-Petrova, Sonia Amodio

[Assessment of River Water Quality using Survival Analysis](#)

Authors: Maria Victória Calderero¹, Federal University of Technology, Brazil

[Response Times Of Electronic Spray Controllers As A Function Of Speed Changes](#)

Authors: Pedro Luiz Bacoccina Kaizer, Luiz Ricardo Nakamura

[Noise Reduced Common PCA for High-Dimensional, Low-Sample Size Multi-View Data](#)

Authors: Hiroki Hasegawa, Homura Kawamura, Ryota Shin, Kazuyoshi Yata, Yukihiro Okada, Jun Kunitatsu

[Recent Developments In Machine Learning Techniques For Handover Optimization In 5G](#)

Authors: Elena Barzizza, Luigi Salmaso, Francesco Trolese

[Decision Tree Models Applied in Sugarcane Cultivation](#)

Authors: Geovana Toledo Zorzi, Thiago Ramires, Luiz Ricardo Nakamura

[Nonstationarity of the Hemodynamic Response Function in Event-Related Functional Magnetic Resonance Imaging](#)

Author: Friederike Preusse

[James Stein Shrinkage for Perturbed Covariance Matrices](#)

Author: Greeshma Balabhadra

SPONSORS

International ASET Inc. would like to thank the following sponsors for their support of ICSTA 2024:

ETHICS & MALPRACTICE

At International ASET Inc., we take matters that relate to ethics in publishing very seriously. We believe that the peer-review publication process is a vital building block of academia, and its integrity must be maintained at all costs, which is why every article will be peer-reviewed by several experts in the field. Under peer-review, experts in the related fields are required to provide opinions and comments on the improvements of the submissions.

We are proud of our efforts towards abiding by the guidelines of ethics, integrity, and high standards in publishing.

Following are the ethics guidelines set by the organizers for the authors and the reviewers of the conference:

Scientific Committees

Scientific committees consisting of experts in the fields are established. The committees oversee the peer-review and publication process. To see the scientific committee members, please follow the link: [Scientific Committee](#)

Equality and Decisions

One or more reviewer, scientific committee member, or chair, (internal or external), are responsible for evaluating the relevance of the submitted manuscripts to the proceedings, technical and scientific merit, originally, and impact. These evaluations are to be carried out regardless of ethnicity, religion, gender, sexual orientation, political beliefs, and institutions. Successive to peer-review, the Chair has full authority and is solely responsible for the published content and the process thereof.

Confidentiality

Scientific committee member(s) and publishing staff may not disclose manuscripts or their content, directly or indirectly, to anyone other than individuals invited to review the manuscript (whether they accept or not), other reviewers of the same publications, and publishing staff.

Conflicts of Interest

Scientific committee member(s) and publishing staff may not utilize the contents of submitted manuscripts whether accepted or rejected, directly or indirectly for their own research purposes without prior written consent by the authors.

ETHICS & MALPRACTICE

Reviewers

Contribution to Decisions

In order for final decisions to be made regarding acceptance or rejection of papers, we rely on peer-review. Peer-review is the process of experts in the field reading, understanding, and objectively commenting on submitted papers. Through peer-review, scholars give back to the academic and scientific community by helping the chair(s) make decisions regarding manuscripts.

Promptness

Reviewers should promptly notify the chair(s) if they are unable or unqualified to carry out their reviewing duties. Reviewers should do their best to provide the reviews to the chair(s) as promptly as possible, and within the designated time-frame.

Acknowledgment of Source

The reviewer should notify the chair(s) if they find any similarities in the paper being reviewed and any other work that has been published previously.

Confidentiality

Reviewers must not share the contents of the manuscripts they receive for review, regardless of their decision to review or contents of the review, directly or indirectly, with anyone other than the person who has assigned the review.

Fairness

Reviewers should review manuscripts fairly and objectively, with supporting evidence or arguments, regardless of personal feelings or biases.

Conflicts of Interest:

Invited reviewers should immediately inform the chair(s) in case of a conflict of interest based on competitive, collaborative, personal, family, and other relationships with the authors or people involved in the work.

ETHICS & MALPRACTICE

Authors

Reporting Standards

The paper being submitted for the proceedings should be based on clear objective, discussion, and references. The findings, data, and the arguments being used in the paper should be accurate. It is author's responsibility to guarantee the authenticity of the data in the paper.

Authorship

Only persons who have significantly contributed to the work and the manuscript can be named authors on a paper. These contributions include the idea/concept, design, experiments, evaluation, analysis, drafting or revision of the manuscript, and others. Authors must all have agreed to be named as such and for the manuscript to be submitted. Anyone who has contributed based on the above, but the level of contribution is not significant, may appear in the acknowledgement section of the manuscript.

Acknowledgement of Source

Acknowledgement to other's work being used in the paper must be given at all times. Authors of the paper should give comprehensive credit where it is necessary, by citing the work, they use for supporting their own research.

Accuracy, Originality, and Plagiarism

Authors should describe their work and the results of their work accurately and in full. The level of provided accuracy and detail should be such that a reader can replicate the work independently. Inaccurate, incomplete, fraudulent, and misleading statements are considered unacceptable and unethical. Direct or indirect use of other people's work is not allowed, unless properly cited. Previous works that have influenced the current work should also be cited. Presenting someone else's work as one's own is strictly prohibited and is considered plagiarism.

Data and Material

Authors are encouraged to share their data, software, or other sharable material online, provided copyright and ownership laws surrounding that particular project permit. Authors may also be asked to share such material with the chair(s), and/or reviewers, and must be willing to do so if asked.

ETHICS & MALPRACTICE

Dual Submissions

Submitting a manuscript to more than one venue (conference, journal, etc) simultaneously is not allowed. Presenting previously published work to be considered as a new submission, without a significant new interpretation or analysis, is prohibited.

Conflicts of Interest

Authors must notify the chair(s) at the time of submission, if any factor outside the scope of the research has influenced any step of the work and manuscript writing. Examples of such factors include but are not limited to funding, grants, advisory and consultancy, stock ownership, current or past employment, and memberships, among others. All funding sources should be disclosed in the manuscript.

Animal and Human Subjects

Works involving human and/or animal subjects must ensure that the work has abided by institutional guidelines, and pre-approved by required bodies. Moreover, consent must be acquired from participants, and privacy of subjects must be ensured. All of the above must be specified with clear statements in the manuscript.

Hazardous Material

It should clearly be identified in the manuscripts if the works have involved hazardous chemicals and material, or devices that can be harmful.

Reporting of Mistakes, Errata, and Retractions

If an author identifies a major error in a published paper, he/she must immediately inform the publisher. Regardless of whether a significant error is reported by the authors of the work or other readers, authors are obligated to take the necessary steps to correct the issue. It is decided on a case-by-case basis whether an erratum will be submitted to notify future readers of the error and correction, or whether the paper will be retracted. Unethical/plagiarism issues mostly result in a retraction, while unintended mistakes will mostly result in the publication of an erratum.

ETHICS & MALPRACTICE

Publisher

Errata and Retractions

The publisher takes the necessary steps to prevent mistakes, academic and scientific misconduct, and unethical behavior, both intended and unintended. When mistakes are reported, the publisher works with chair(s) and authors to publish an erratum clarifying the issue. In cases where the mistakes are severe and significant, the paper might be retracted. If unethical behavior, plagiarism, academic and scientific misconduct, or other such activities are proven to have taken place by an author or authors, the publisher will retract the paper.

Content and Archiving

The publisher preserves and stores all content digitally on their own servers, as well as through partnering with Portico (Digital Preservation and Electronic Archiving Service).

Copyright and Access:

The proceedings and related papers are all based on the open-access model, which means interested individuals and institutions can access the material for free.

Users are allowed to read, download, copy, distribute, print, search, or link to the full texts of the articles in this proceedings without asking prior permission from the publisher or the author. This is in accordance with the BOAI definition of open access.

Ownership and Management:

This conference-proceedings is managed and operated by the International ASET (International Academy of Science, Engineering, and Technology) and Avestia Publishing (the publishing arm of ASET).

Schedule:

This conference proceeding accompanies the conference, meaning a new proceedings will be published every year for the corresponding annual conference of this series.
